Assignment: Giving Instructions

Date: 8/31/2022

1. Where the shapes in reference to the other shapes was very good. We were able to put the shapes in almost the correct places. There were also not any unnecessary details. He gave examples of what the overlapping shapes looked like so it was easy to know how to draw the shapes according to the shape that it was either inside or next to
2. The instructions were a little hard to follow when talking about size of the shapes. We thought we had an idea of the shapes and what size they were, but after listening to the rest of the description, then we knew that they were drawn wrong. The explanations were very long so had to wait to draw each shape.
3. Wait longer before we start to draw and hear the full instructions on each shape. Make sure to be more intentional on choosing the side of the paper in which the shape is on. Also, hear the full instructions to know how big to draw the shapes, so that they are as similar as possible
