# Section: 504  
# Assignment: Lab 3  
# Date: 8/29/2022

-You are currently at Zachry Engineering, exit through the North Eastern exit facing Bizzell st.

- Take a left at the street heading towards the four way stop.

- At the stop do not cross, take an immediate Left going along University.

- Keep walking until you reach the U.S postal services to your left, then take the first left going into Campus.

-In front of you is the Sibisa dining hall, at Sibisa take a right.

- Head towards the basketball courts next to Moses resident hall then take a right onto the path between the two halls.

- Take a right onto Jones street and take a right at the bell tower heading away from campus.

- Continue straight and take a right on Olsen Blvd. in front of the animal science center.

- Continue on Olsen Blvd. Until you see Reed arena on your right and then cross the street.

#The instructions were clear and would get me to the destination. The only thing that is unclear is the beginning on where to exit the building and which was to go.

Kind of complicated and uses buildings as reference which are hard to identify.

Directions:

- Walk out of the room and take a right, when you get down the hall take a left and go down the stairs you will see
- After getting down the stairs, take a right and keep going until you walk out of the building
- Take a left and you will run into Spence Street in which you will take a left on
- After this you will run into Ross Street which you will take a right onto
- You will take a left once you pass Thompson Hall. This will be in between Thompson Hall and the department of engineering
- You will keep walking past Bolton Hall and through the academic plaza until you run into the student service building on your right
- You will continue walking in between the rudder tower and the MSC and take a right
- You will keep walking past Kyle field which will be on your left
- Keep walking until you pass Olsen Blvd and take a walk through the parking lot that will be on your left and that will get you to Reed Arena

# Directions were clear, but there is a lack of visual cues.

A first time visitor to campus without a map could not easily identify some of these places, such as academic plaza, rudder, and MSC.

Leave ZACH 353 and walk right towards the main stairs. Hydrate  
Descend the stairs to ground level and leave Zachry Engineering Complex from the north side.  
Turn left and walk down University drive. Watch for cars.  
Turn left onto Olsen blvd. Watch for cars.  
Continue south until you reach Reed Arena Lp.  
Turn right. Hydrate.  
You have arrived at your destination.

#Most direct route

#Not really sure how far the walk is.

#Good reminders to Hydrate

#Would get me to desired destination

Turn right after exiting the class (room 353)

Turn left from the hallway

Turn right to the lifts

Go to floor number one

Take a left from the elevator and take the exit on the right

Go right after exiting till you reach the road walk and take a left from there

Go right from the first intersection

Walk straight until you see a fountain on your right

From there go left and take the brick path till you see a building in front of you

Take right from the building and walk straight until you see a road

Take a left on the road and take the next right

Walk straight and take a left on the second junction.

Once you pass the parking lot, reed arena will be on your right.

# Not much certainty in where you are turning.

#Unclear on what buildings or streets to turn on

# Multiple fountains on campus so could get confusing

# With plenty of looking around, I would get to my destination, but might lose my way along the way

Kind of vague. Would be hard to follow

A. The third set of directions was the best because it had very few turns and used major road signs as their way of directing them. There wasn't any kind of use of the landmarks around campus. Anyone that could read street signs and have a small amount of direction would be able to get there

B. Some went through campus while some went around campus (different routes). Some people decided to use just turns like street signs while other people used landmarks like the MSC or Kyle Field.

C. They all ended up on Olsen Blvd.

D.

- If the weather was different like rainy then I would go through campus. I also would choose to use different landmarks throughout campus if they had already known the campus.

E. How far can you walk? How much time do you have? Are you a student or a visitor? Do you have any disabilities? How familiar are you with campus?
